

Power up your data protection solution with the NDMP Module

Administrators can develop a customized backup strategy that protects information on infrastructures which utilize Network Data Management Protocol (NDMP).

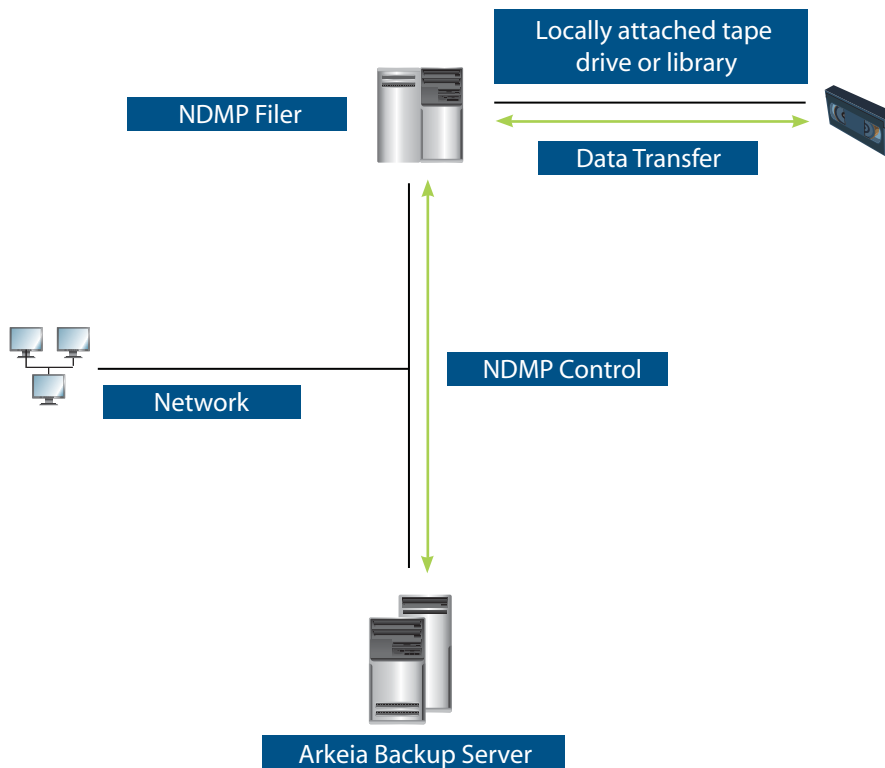

NDMP defines a common architecture for the way heterogeneous servers on a network are backed up. The protocol allows creation of common agents used by the central backup application to protect different file servers running different platforms and platform versions.

Arkeia Network Backup supports NDMP and is compatible with NDMP-based NAS such as Network Appliance and Snap Appliance.

Arkeia can backup the NAS to a locally attached tape drive or library, and all backup and restore functions can be performed via the graphical user interface. Key benefits of this technology include reduced backup windows and faster data restore of the filer.

Module Features

- NDMP v3 compliant
- NAS Backup to a locally attached Tape Drive or Library
- NDMP Backup and restore managed via Arkeia GUI or command-line interface

Arkeia NDMP Module

Maximize the benefits of NDMP with the Arkeia module that protects NAS device data through centralized GUI management.

There is an Arkeia answer for every data protection need.

- ▶ **All-in-one solution for enterprises with distributed data:**
 - Arkeia EdgeFort
- ▶ **Scalable backup solution for mid-sized and large networks:**
 - Arkeia Network Backup
- ▶ **Automatic bare-metal restore:**
 - Arkeia Disaster Recovery
- ▶ **Hot backup solutions for running applications:**
 - Arkeia Options

Arkeia NDMP Module

Solid Backup Technology

- ▶ Utilizing proven Arkeia Software technology, Arkeia Network Backup performs NDMP NAS backup to centralize the backup management of the filer within the complete network backup strategy. This also avoids data traffic over the network by backing up the NAS to a locally attached SCSI tape device.
- ▶ The NDMP module allows seamless interoperability in a heterogeneous server environment utilizing NAS devices.
- ▶ NDMP backup is easily set up with a few clicks in the convenient Arkeia GUI. The NDMP module can also be configured manually through the command-line interface.
- ▶ The NDMP module offers unique opportunities to take advantage of whatever options are built into the NAS device, such as incremental backup, encryption, or compression.

Fast, Customized Recovery

- ▶ Supports Direct Access Recovery (DAR) with NDMP servers that offer this feature.
- ▶ Convenient Arkeia Index Navigator provides a specific NDMP view.

100,000 Networks Protected

5,000 Enterprise Customers

50 Countries

Federated Data Protection

- ▶ **Disaster Recovery Options**
 - Windows and Linux Server Disaster Recovery
- ▶ **Application & Database Modules**
 - MS Exchange Server
 - MS SQL Server
 - MySQL
 - Open-Xchange (including SLOX)
 - Lotus
 - Oracle
 - PostgreSQL
 - DB2
 - LDAP
- ▶ **NDMP**
 - 3-Way NDMP
 - V2 & V3 Supported
